

Ready for some Insane Cash

Making Money with Downloads

Brought to You By BlackhatBUZZ.com

What is Yiyd.com?

Yiyd.com is an online file hosting service (such as Rapidshare or Megaupload). Yet Yiyd.com has something that Rapidshare or Megaupload don't offer: they pay you every time someone downloads your file!

It sounds truly amazing doesn't it? But then how does Yiyd.com make money? Well there is a tiny catch: every time someone wants to download your file they must fill in a survey. If that person doesn't want to do that, they can buy a premium account and they get to skip the surveys.

How much Can you earn?

Yiyd.com will pay you at least 40 cents for every download within the United States, United Kingdom, Canada, or Australia. For international downloads you will receive at least 25 cents per download.

Some of you may think: WOW! 40 cents every time someone downloads a file!

And others may think: Hmmm 40 cents? That's not much...

For starters 40 cents is the MINIMUM you will get for a download within the above mentioned countries. Second of all in comparison to other sites that's quite amazing! Most sites will only pay pay \$10 for 1000 downloads. Which means:

- $\$10/1000 = 1$ cent per download
- You will not even get your money until the 1000th download is made.

The above shows you how great Yiyd.com really is. But now let's turn the above stats into a scenario in which you're using Yiyd.com

- 1000 downloads = $1000 \times \$0.40 = \$400!$
- You can cashout anything above \$10, so you get your money when you want!

Now the above is how much you earn from downloads. There are 2 more ways you can make money with Yiyd.com!

When someone buys a premium account (after using your link) you will get 30% of the money they spent on it! So, if they buy a premium account for \$10 – you get \$3 of it.

The third way for you to make money is referring people to Yiyd.com. When you refer someone you will get 10% of what they earn –FOR LIFE- (that does not mean they will get 90% of the profits, it means that you as a referrer will get a bonus of 10% of whatever your referred user earns!) So the more you refer the more money you get!

Generally speaking, there are 3 ways to make money using Yiyd.com.

- Downloads
- Premium Accounts
- Affiliates

You are now ready and set to make money!

A Few Methods and Techniques

In this e-book we will be looking at 5 top Methods to make insane money with Yiyd.com.

The first method is called the “torrent trick” and it is very simple yet probably the most effective. This method is called the torrent trick not because we are tricking people into a fake download: we are tricking people legally:

The fundamental idea of this strategy is to make P2P users download torrents NOT with the file they are looking for but with a text file with your Yiyd download link to the file they are looking for.

This method is limited to files that are no larger than 200 mb (which is the maximum file size on Yiyd). But the restriction is not bad, as the user must therefore download 2 parts of the file earning you 2 times as much. Some may argue that the person will not want to fill in 2 surveys but there is a way to trick the person into doing that. All you have to do is put the download link to the second part of the file in an archive with the first file part and inform the downloader that there is a second part only after he downloaded the first part: as the person already downloaded half the file they may as well do the other half.

This is how you execute this method: first find a popular file on a torrent website (such as www.thepiratebay.org) and download it. Then upload it to your Yiyd.com account and get the download link. After you have done that place the download link (and password if you want) in a .txt file. Then create a torrent for your txt file and upload it to the torrent site.

Once you have done that. Just upload your torrent to your preferred torrent site and watch the money flow into your Yiyd.com account!

The second method is called the forum method. It is also insanely amazing but with this method, the more you work on it the more you will earn. The idea behind this is not to spam your link on forums and hope for downloads, that never works. People will only download your file if they want it. This technique has two sub techniques to it. The first way is to find highly populated forums and post something very related.

Here is an example: let's say we have a highly populated guitar forum. The idea is to offer a download to a file that everyone on the forum can use. Every guitarist can use some tips. Google "guitar tips e-book" and find something you like. Then upload it to Yiyd.com and start a thread on the forum. You have to mention it's free and mention that it's a must have even for professionals. And that's it! Watch how many people download your file! It's insane!

The other sub technique may cost you a few bucks but is far more effective. Let's use an example: we're still on our guitar forum and there is a user with 20,000 posts. This means his posts are basically ALL over the forum. Every user has a signature which is a set picture/text at the bottom of every of the users posts.

All you have to do is offer that user for example \$20/month to rent his signature space. In that signature space you will have a few of your Yiyd download links with related downloads (such as the mentioned guitar tips) that will be displayed under every one of that users posts. That means that your download links are everywhere for everyone to see, click and make you money.

This is the most profitable technique but it may cost you a little to rent the signature space.

The third way to make insane money is free advertising of your links using for eg. Youtube.

There are many ways you can attempt this. One way is to literally take a real advert of a product (that you have uploaded to Yiyd of course) and just put your download link in the description. This is very effective especially if your video is the only one there for that product (but that is extremely rare).

Another way to take advantage of youtube is to make your own advert for something your supplying a download link for. You can either review the product or film your own (if its funny it helps) advert for the product and just supply the link.

A third way to advertise your links via youtube is to reply to videos. Find videos that have something to do with your download and just comment on the videos posting your download link.

A fourth way is similar to the second forum method. Pay someone who has a popular video to post your download link in his or her video. If that video happens to have something to do with your download this option is a must!

This next method is a bit of a gamble but if it works , you will make some serious CASH. I have personally seen others use this technique many times at once.

The idea behind this is to buy traffic that will then earn you more money than you spend on traffic. Let's say you buy a 10,000 traffic package on a site like Full Traffic for \$15.

Let's say every click downloads your file,

- That's $10,000 \times 40 \text{ cents} = 400\,000 \text{ cents} = \$4000!$
- So you make $\$4000 - \$15 = \$3985.$

Now that is some profit!

Tips

NEVER violate Yiyd.com rules. If you do one thing wrong and they ban your account you will lose all your profits! This also applies to trying to cheat their system with proxies etc. This does not work as it has been patched a while back. Yiyd.com has also invested in a fraud detection system so beware!

**You are now ready to make insane
money with Yiyd.com!**

Good Luck!
