### Step 4:

With your collected trends and sub-sequentially spurred titles, create a few doorway videos – by this I mean, 'YouTube took the video down for reasons unknown to me and threatened to block my account – visit here\*' for the real video'

### Step 5:

Link them to your gateway page, or have them complete a CPA offer to unlock the video

### Step 6:

Watch your earnings, grow and experiment with different YouTube categories.

**Helpful Note:** Be sure to twist this as far as you can, be as realistic in the doorway video as possible. Also, when deciding which trends to use for your video, ask yourself whether 'You' will visit YouTube to watch Your video... if your answer is even remotely, 'Yes', go to watch Your video... if your answer is even remotely, 'Yes', go ahead with it.

### Step 5:

### Step 6:

Add your affiliate links to your listing, and be sure to sell them on the point that there is something to gain from ordering through your link and from your affiliate service or program.

**Helpful Note:** For more conversions and higher income, be highly creative with your listing, try not to go into too much detail about the eBay listing itself, or you could raise eyebrows on why you are selling something on eBay that is selling outside of eBay – as people sometimes don't like that. Also, find high priced items with plenty of hungry buyers to maximize your earnings.

### Step 6:

**Helpful Note:** On this method it is dead important to be creative with the video review, try to make it attract attention, using all the tricks you can think of – sexy female pictures work pretty well in most cases. Also, try to use newer products; this is important because quite often the buzz surrounding these products don't last too long after their launch. #### Step 6:

Watch your earnings grow as your articles rank higher on the article websites and even make it onto the first page of Google for their relevant keywords.

**Helpful Note:** This method is basically a copy of the first Articles Method, but I felt it was worth pointing out this side to that method this way. Be efficient with time management on this method, be sure to create a routine for posting up as many articles a day as feasible for you; do not get lazy or complacent, no matter how tedious it may seem. And as your earnings grow, you will be able to free up more funds which can then be directed in the way of outsourcing.

# FaceBook Method

## Methods to make real money every week

IT IS BETTER TO TWIST THIS UP BE USING THIS METHOD

### Step 1:

Sign up a Facebook Account

### Step 2:

Sign up with Affiliate programs selling merchandise like shirts, for example Zazzle

### Step 3:

Find tangible trends using Google Trends, or Twitter's trending topics or maybe even popular topics going on Facebook itself, and record them. Trends like, 'Halo Reach', 'Carter 4', 'Kid Cudi', 'Lil Wayne'

### Step 4:

Using Facebook's search posts by everyone feature, search for your specific popular topic that you plan on promoting with, and send each person a message.

### Step 5:

The message should be attractive and enticing, it should make the reader feel as though it would really worth it if bought the merchandise relating to that topic.

### Step 6:

Now I know this might seem a lot like hard-selling, because it basically is, but the returns can be very good; so at this stage you will be seeing pretty nice returns if done right.

**Helpful Note:** Again, really be sure to twist this as far as you can imagine, be as attractive as you can be in every way while promoting the affiliated merchandise, this will help conversions. Make sure you target the right niches and topics when doing this, many of them will have a target audience of people who might not be in the ideal position or of the ideal age to order merchandise online, so be smart.

## FINAL TIPS

### Methods to make real money every week

IT IS BETTER TO TWIST THIS UP BE USING THIS METHOD

#### TIP 1:

Play the game your way; don't read off the paper; it's fingerprint money – what do all these sayings mean?

Don't use methods you find on the internet in the blatant heap they appear in, TWIST THEM UP as much as you possibly can, and always work on new ways to twist up your methods.

#### TIP 2:

If it helps, layout your methods in a structure; use this to be able to substitute parts in and out, this way you can more easily create new money making opportunities.

#### TIP 3:

Start manual then proceed to semi-automatic...

This means that before you even look for automation software, try and test the method manually – this is a common mistake for many. You see a method you think is highly attractive and want to jump on it and start making thousands daily on it – even though you haven't even identified whether it can make hundreds.

#### TIP 4:

Revisit 'DEAD' money making opportunities, because just like raw materials, they will at some point decay back to full strength, if you get what I mean? Saturation is never permanent.

#### TIP 5:

Keep an eye on new web 2.0 sites as they pop up, they might give birth to a gold mine for you before anyone else can notice – very important.

#### TIP 6:

Be very, very, VERY, SMART when playing the IM game.

Sometimes the difference between \$1,000 and \$10,000 is a simple case of common sense, which you might miss if you don't think on your feet and are not being SMART.
